

BIOGRAPHICAL SKETCH

James Stogner

SPD Consultant

James has over 20 years of experience in Sterile Processing Services as a technician, a manager, and instructor. James has developed instrument processing techniques which typically lead to a 20% improvement in tray assembly time. James is familiar with all aspects of daily operations for the Sterile Processing Department including strict adherence to policy and procedures, and AAMI standards for best practice. James is knowledgeable in handling all specialty instrumentation, as well as robotics and flexible scopes. James works with staff to ensure that WISHA, OSHA, AORN, and AAMI's recommended best practices are followed. James has experience with all forms of sterilization and high level disinfection, and has been able to make drastic reductions in the immediate use sterilization rates in the operating rooms of acute care hospitals, trauma centers and outpatient surgery centers. He has a background in developing streamlined case cart building procedures to improve accuracy while reducing unused product at the end of the case.
